Lab Technician / Scientist (m/f/d) Analytical Development

Beispiel Pharma GmbH (fictional) · Hanau, Rhine-Main area · full time · permanent · start as soon as possible or by arrangement

ABOUT US

We are a mid-sized pharmaceutical manufacturer in the Rhine-Main area with international customers and a growing portfolio of generics. In analytical development we develop and validate the methods used to test our products over their entire life cycle.

YOUR TASKS

- Analysis of active ingredients and finished products (HPLC/UHPLC, GC, UV/Vis, Karl Fischer titration, dissolution)
- Method development and method validation according to ICH guidelines (ICH Q2)
- Documentation according to GMP, maintaining results in LIMS, working according to SOPs
- Interface between development, quality control and production
- Support of OOS investigations and deviations including root cause analysis

YOUR PROFILE

Must-have criteria

- Completed degree in chemistry or pharmacy (B.Sc./M.Sc.) or completed training as a chemical or pharmaceutical technician with work experience
- Hands-on experience in HPLC analysis
- Good written and spoken English
- Experience with GMP-compliant documentation

Nice-to-have criteria

- Experience with Empower or a comparable chromatography data system (CDS)
- Knowledge of method validation according to ICH Q2
- Experience with OOS investigations
- Experience working with production and quality control
- Confident with MS Office, LIMS experience is a plus

You work in a structured way, keep an overview even in stressful phases and enjoy teamwork.

WHAT WE OFFER

- Flexible working hours, 30 days of vacation
- Structured onboarding and training
- Company bike, subsidy for the Deutschlandticket, company pension scheme

SCREENING QUESTIONS (FOR THE APPLICANT TRACKING SYSTEM)

- Do you have a valid work permit for Germany / the EU?
- When could you start at the earliest?
- What is your salary expectation (gross per year)?

- How much hands-on HPLC experience do you have (in months)?
- What is your level of English?

Fictional demo job description for the workshop “Next Step: How we apply for jobs today” (PIOLA Automations). For creating the position in the PIOLA Portal for the live CV screening demo. Expected scores: Lena Berger high (all must-haves, almost all nice-to-haves), Jonas Weigel medium (HPLC practice and documentation yes, GMP and ICH missing), Mira Kaya low (no degree, no HPLC practice).
